# Minnesota Early Childhood Screening -- Do Ahead of Age 4

**Minnesota State Law mandates that children at the age of 3 1/2 - 4 years participate in a developmental early childhood screening before entering school.** The purpose of the screening is to identify children who may have health and learning problems, but it is not intended to substitute for health care from your family physician, dentist or other provider. It will consist of the following components: fine/gross motor skills, language development, concepts, height/weight, vision, hearing, review of child's health history and immunization records. **If your child is near 4 years of age and has not been screened,** contact Community Education at 283-4724 or the elementary school at 283-4497 for more information. Please be sure your child is included on the Luverne Preschool Census so that you will be notified by letter of the screening date. The next screening date for Luverne School District will be January 28.

## Preschool Census

***Do you have a new baby?***
***Have you moved into the***
***Luverne school district and have***
***preschool age children?***

If so, give Community Education a call at 283-4724. We will add your child's name to our preschool census so that you will receive up-to-date mailings about activities that are offered for your preschooler. Funding for many of our programs is based on population, so an accurate census is important. The school district also needs the census for advance planning purposes.

## Free Developmental 0-2 years Screening

**for children living in Rock County**

Areas screened include personal and social skills, self-help skills, large and small muscle skills, language skills and hearing. Receive child development information and free products. Winter screening date will be announced in Winter Brochure. Call 283-4724 for more information or to request an appointment time.

***Sponsored by Rock County Help Me Grow.***
